SUMMARY OF ANALYSIS REPORT

To: Essex-Windsor SWA CQA Member#: 07-1200

360 Fairview Ave West Essex, Ontario N8M 3G4

Attention: Sample I.D.: ROW C

Report#: C21215-10232 Sample Date: 2021-07-21

C21215-70002 Reported Date: 2021-8-11

Compost to be Manufacture in: Ontario

Feedstock: Leaf & Yard Residues

CQA COMPOST QUALITY & VALUE TESTING PARAMETERS REPORT

SAMPLE ID	RECOMMENDED END USE/MARKET
ROW C	Category AA
Regulatory	See Appendix I
Product Quality	See Appendix II
Product Value/ Soil	See Appendix III
Suitability*	(Soil, Enviro, Manure Compost)

The Compost Quality Alliance (CQA) is a voluntary quality monitoring program established by the Compost Council of Canada and the compost producers utilizing recognized standardized testing methodologies and uniform operating protocols to provide customer assurance in compost selection its use, and proper end-use utilization.

All analysis of this compost product was conducted and provided by A&L Canada Laboratories Inc. for the Compost Quality Alliance (CQA).

*PLEASE NOTE: Major Nutrients under the Fertilizer Act and Regulations (CFIA)

Please see Appendix III for nutrient content (of impact to claims and labelling if used in declarations).

Compost is classified in Schedule II as a supplement, and as such nutrient guarantees are not mandatory. However, if any claims are made regarding nutritional value of the product, such as for composted manure, the product would then be classified as a supplement and a fertilizer, and the label would have to include the guarantees for the major nutrients include the minimum amounts of Total Nitrogen (N), Available Phosphoric Acid (P205) and Soluble Potash K20. Source: T-4-120 - Regulation of Compost under the Fertilizers Act and Regulations. http://www.inspection.gc.ca/plants/fertilizers/trade-memoranda/t-4-120/eng/1307910204607/1307910352783

Appendix I Ontario Compost Guidelines 2012 & CFIA Fertilizer Act & Regulations

A. Maximum Concentrations for Trace Metals in Compost - Ontario

		Category AA	Category A	Category B			
Trace Elements	Test Results	Maximum Concentration within Product					
	(ug/g)	(mg/kg dry weight)					
Arsenic (As)	5.85	13	13	75			
Cadmium (Cd)	BDL	3	3	20			
Chromium (Cr)	19.31	210	210	1060			
Cobalt (Co)	2.86	34	34	150			
Copper (Cu)	37.10	100	400	760			
Lead (Pb)	18.94	150	150	500			
Mercury (Hg)	BDL	0.8	0.8	5			
Molybdenum (Mo)	3.30	5	5	20			
Nickel (Ni)	10.62	62	62	180			
Selenium (Se)	BDL	2	2	14			
Zinc (Zn)	117.00	500	700	1850			

B. Foreign Matter in Compost - Ontario+

	Test Results	Category AA	Category A	Category B	
Foreign Matter		Contains < 1% F	M greater than	Contains < 2% FM greater	
Percent (%) FM > 3mm/500mL	BDL	3mm and 0.5%	plastics. Shall	than 3mm and 0.5%	
Percent (%) Plastics > 3mm/500mL	BDL	not contain any	FM greater than	plastic. No FM >	
Pieces 25mm/500mL	0	25mm/500mL		25mm/500mL	
Sharp Foreign Matter		No oborn mottor	that can cause	No more than 3 pieces of	
Pieces > 3mm/500mL	0	No sharp matter that can cause human or animal injury		sharp matter no greater	
Pieces > 12.5mm/500mL	0	naman or a	ininai injury	than 12.5mm/500mL	

C. Maturity/Stability - Ontario+

Method	Test Results	Required Limits			
CO ₂ Respiration Rate	2.60	≤ 4 mg of carbon in the form of carbon dioxide per			
CO ₂ Respiration Rate	Test Results 2.60	gram of organic matter per day			
O ₂ Uptake Respiration Rate		≤ 400 mg oxygen/kg of volatile solids (or organic			
O ₂ Uptake Respiration Rate		matter)/hour			

D. Pathogens - Ontario+

Pathogen	Test Results	Required Limits
E. coli (MPN/g dry)	<3	<1000 MPN/g total solids calculated on a dry weight basis
Salmonella (P-A/25g(ml))	NEGATIVE	<3 MPN/4g total solids calculated on a dry weight basis

+The following references are from the Ontario Compost Quality Standards Guidelines July 2012

*BDL = Below Detectable Limits

E. CFIA - Ontario

Parameter	Test Results
Total Organic Matter (%)	46.64%
Moisture (%)	25.30%

Appendix II Finished Compost Quality

Parameter	Test Results
pH	8.2
Carbon to Nitrogen Ratio	10:1
Particle Size/Texture (inch)+	1/4 Inch
Soluble Salts (ms/cm)	2.0
Sodium Base Saturation (%Na)	1.45%
Major Nutrients	
Available Potassium (%K)	27.90%
Available Magnesium (%Mg)	24.33%
Available Calcium (%Ca)	46.32%

⁺ Majority of sample passes through this sieve size

Reference Compost Quality Parameters for CQA

Remediation	5.8-8.5	10-40	NA	<2 in	<20	<3%
Soil Amendment	5.8-8.5	10-30	NA	<1/2 in	<6	<2%
Landscaping	5.8-8.5	12-22	<50%	<1/2 in	<5	<2%
Planting Media	5.5-7.8	12-22	<50%	<1/2 in	<4	<2%
Turf Establishment & Topdressing	5.5-7.8	12-22	<50%	<3/8 in	<3	<1%
Greenhouse Seeding	6-7	12-22	<25%	<1/4 in	<2	<0.5%
Greenhouse Establishement	6-7	12-22	<30%	<1/2 in	2-3.5	<0.5%
Field Nursery	5.8-8	10-30	<50%	<1/2 in	<3.5	<1%
Agricultural Soil Amendments	6-8	10-30	<50%	<1/2 in	<20	none
Potting Soil	5.5-7.2	12-22	<50%	<1/4 in	<2	<1%

Unrestricted Use: Category AA and Category A - Compost that can be used in any application, such as agricultural lands, residential gardens, horticultural operations, the nursery industry, and other businesses. Category A criteria for trace elements are achievable using best source separated MSW feedstock, municipal biosolids, pulp and paper mill biosolids, or manure.

Restricted Use: Category B - Compost that has a restricted use because of the presence of sharp foreign matter or higher trace element content. Category B compost may require additional control when deemed necessary by a province or territory.

Note: For a compost to meet the unrestricted use category, it must meet the unrestricted (Category A) requirements for all trace elements and sharp foreign matter. If the compost fails one criterion of the guideline for unrestricted use but meets the criteria for restricted (Category B) use, then is is classified as a Category B product. Products that do not meet the criteria for either Category A or B must be used or disposed of appropriately.

Appendix III Compost Agricultural Product Value

as is basis

Agricultural End-Use	Analysis Result	Unit	Quantity in lbs/T
	Physical Parameters		
Dry Matter	74.70%	%	
рН	8.2		
Bulk Density	583	kg/m3	
C:N Ratio	10:1		
	Fertilizer Equivalent Mine	erals	
Nitrogen Total	2.49%	%	49.8
Ammonium Nitrogen	227.35	ppm	0.45
Total Phosphate (P as P205)	0.33%	%	6.6
Total Potash (K as K20)	0.83%	%	16.6
Calcium	2.33%	%	46.6
Magnesium	0.63%	%	12.6
Sulfur	1490.27	ppm	3.0

The Compost Quality Assurance program goes beyond the provincial requirements to establish full value and appropriate end-use. The Compost Report and Compost End-use table in Appendix II, has 10 different compost application uses from soil remediation, through to potting soil blends. Of note are available soluble salt limits and the percent available sodium for sensitive plants. Appendix III, lists the primary agricultural use parameters and quantitative nutrient content that reflects this compost samples agricultural end-use, and application value. This value includes macro and micro nutrients, soil building properties such as the addition of organic matter, increasing moisture holding capacity, and the soils slow release nutrients. These parameters improve beneficial soil health components soil structure and stability.

The results of our testing on this sample indicates that this product is a fine textured, compost (90%+ 1/4 in.), with rich mineral properties, which would meet criteria for agricultural soil amendment, blending and topdressing end-uses purposes. The C:N ratio 10:1 from Appendix II, on the soil suitability report indicates a low C:N ratio and indicating good nitrogen availability. The low C:N ratio in conjunction with the higher total nitrogen content listed in Appendix III indicates early high available nitrogen levels, and should be considered for crop planning.

The proportion of available sodium (1.45% Na), which if used in too heavy a proportion could cause some problems with sensitive species. The sodium levels of this compost sample though high, is suitable for agricultural broadcast field applications and are made to improve the organic matter level and major nutrients phosphorus, potassium and magnesium levels. The compost is also rich in available calcium, sulfur, and zinc, which make it ideal for soil enriching, and amendment. We recommend blending this material at a minimum of 2-3 parts soil blended to each part of this compost to dilute the sodium concentration.

Major Nutrients - Compost is classified in Schedule II (CFIA Fertilizer Act & Regulations) as a supplement, and as such, nutrient guarantees are not mandatory. However, if any claims are made regarding nutritional value of the product, such as for composted manure, the product would then be classified as a supplement and a fertilizer, and label would have to include the guarantees for the major nutrients. The guarantees for the major nutrients include the minimum amounts of Total Nitrogen (N), Available Phosphoric Acid (P205) and Soluble Potash (K20).
