SUMMARY OF ANALYSIS REPORT

To: Essex-Windsor SWA
360 Fairview Ave West
Essex, Ontario N8M 3G4

CQA Member#: 07-1200

Attention:

Sample I.D.: ROW N17

Report#: C18075-10018
C18075-70000

Sample Date:
Reported Date: 2018-3-23

Compost to be Manufacture in: Ontario
Feedstock: Leaf and Yard Residues

CQA COMPOST QUALITY & VALUE TESTING PARAMETERS REPORT

SAMPLE ID	RECOMMENDED END USE/MARKET
ROW N17	Category AA
Regulatory	See Appendix I
Product Quality	See Appendix II
Product Value/ Soil	See Appendix III
Suitability*	(Soil, Enviro, Manure Compost)

The Compost Quality Alliance (CQA) is a voluntary quality monitoring program established by the Compost Council of Canada and the compost producers utilizing recognized standardized testing methodologies and uniform operating protocols to provide customer assurance in compost selection its use, and proper end-use utilization.

All analysis of this compost product was conducted and provided by A&L Canada Laboratories Inc. for the Compost Quality Alliance (CQA).

Haifeng Song, Senior Chemist

Ian McLachlin, Vice-President

A&L Canada Laboratories Inc.

A proud member of

*PLEASE NOTE: Major Nutrients under the Fertilizer Act and Regulations (CFIA)

Please see Appendix III for nutrient content (of impact to claims and labelling if used in declarations).

Compost is classified in Schedule II as a supplement, and as such nutrient guarantees are not mandatory. However, if any claims are made regarding nutritional value of the product, such as for composted manure, the product would then be classified as a supplement and a fertilizer, and the label would have to include the guarantees for the major nutrients. The guarantees for the major nutrients include the minimum amounts of Total Nitrogen (N), Available Phosphoric Acid (P2O5) and Soluble Potash K2O. Source: T-4-120 - Regulation of Compost under the Fertilizers Act and Regulations. <http://www.inspection.gc.ca/plants/fertilizers/trade-memoranda/t-4-120/eng/1307910204607/1307910352783>

Appendix I
Ontario Compost Guidelines 2012 & CFIA Fertilizer
Act & Regulations

A. Maximum Concentrations for Trace Metals in Compost - Ontario†

Trace Elements	Test Results (ug/g)	Category AA	Category A	Category B
		Maximum Concentration within Product (mg/kg dry weight)		
Arsenic (As)	6.80	13	13	75
Cadmium (Cd)	BDL*	3	3	20
Chromium (Cr)	15.27	210	210	1060
Cobalt (Co)	2.54	34	34	150
Copper (Cu)	37.02	100	400	760
Lead (Pb)	18.76	150	150	500
Mercury (Hg)	BDL*	0.8	0.8	5
Molybdenum (Mo)	1.90	5	5	20
Nickel (Ni)	7.62	62	62	180
Selenium (Se)	1.56	2	2	14
Zinc (Zn)	97.35	500	700	1850

B. Foreign Matter in Compost - Ontario†

Test Results		Category AA	Category A	Category B
Foreign Matter		Contains < 1% FM greater than 3mm and 0.5% plastics. Shall not contain any FM greater than 25mm/500mL	Category A	Contains < 2% FM greater than 3mm and 0.5% plastic. No FM > 25mm/500mL
Percent (%) FM > 3mm/500mL	BDL*			
Percent (%) Plastics > 3mm/500mL	BDL*			
Pieces 25mm/500mL	0	No sharp matter that can cause human or animal injury	Category A	No more than 3 pieces of sharp matter no greater than 12.5mm/500mL
Sharp Foreign Matter				
Pieces > 3mm/500mL	0			
Pieces > 12.5mm/500mL	0			

C. Maturity/Stability - Ontario†

Method	Test Results	Required Limits
CO₂ Respiration Rate CO ₂ Respiration Rate	1.90	≤ 4 mg of carbon in the form of carbon dioxide per gram of organic matter per day
O₂ Uptake Respiration Rate O ₂ Uptake Respiration Rate		≤ 400 mg oxygen/kg of volatile solids (or organic matter)/hour

D. Pathogens - Ontario†

Pathogen	Test Results	Required Limits
E. coli (MPN/g dry)	<3	<1000 MPN/g total solids calculated on a dry weight basis
Salmonella (P-A/25g(ml))	NEGATIVE	<3 MPN/4g total solids calculated on a dry weight basis

†The following references are from the Ontario Compost Quality Standards Guidelines July 2012

*BDL = Below Detectable Limits

E. CFIA - Ontario

Parameter	Test Results
Total Organic Matter (%)	44.55%
Moisture (%)	39.69%

Appendix II Finished Compost Quality

Parameter	Test Results
pH	7.9
Carbon to Nitrogen Ratio	19:1
Particle Size/Texture (inch)+	3/8 Inch
Soluble Salts (ms/cm)	2.3
Sodium Base Saturation (%Na)	2.72%
Major Nutrients	
Available Potassium (%K)	15.25%
Available Magnesium (%Mg)	19.89%
Available Calcium (%Ca)	62.14%

+ Majority of sample passes through this sieve size

Reference Compost Quality Parameters for CQA

Use	pH	C:N	Moisture	Particle Size	Soluble Salts	%Na
Remediation	5.8-8.5	10-40	NA	<2 in	<20	<3%
Soil Amendment	5.8-8.5	10-30	NA	<1/2 in	<6	<2%
Landscaping	5.8-8.5	12-22	<50%	<1/2 in	<5	<2%
Planting Media	5.5-7.8	12-22	<50%	<1/2 in	<4	<2%
Turf Establishment & Topdressing	5.5-7.8	12-22	<50%	<3/8 in	<3	<1%
Greenhouse Seeding	6-7	12-22	<25%	<1/4 in	<2	<0.5%
Greenhouse Establishment	6-7	12-22	<30%	<1/2 in	2-3.5	<0.5%
Field Nursery	5.8-8	10-30	<50%	<1/2 in	<3.5	<1%
Agricultural Soil Amendments	6-8	10-30	<50%	<1/2 in	<20	<1%
Potting Soil	5.5-7.2	12-22	<50%	<1/4 in	<2	<1%

Unrestricted Use: Category AA and Category A - Compost that can be used in any application, such as agricultural lands, residential gardens, horticultural operations, the nursery industry, and other businesses. Category A criteria for trace elements are achievable using best source separated MSW feedstock, municipal biosolids, pulp and paper mill biosolids, or manure.

Restricted Use: Category B - Compost that has a restricted use because of the presence of sharp foreign matter or higher trace element content. Category B compost may require additional control when deemed necessary by a province or territory.

Note: For a compost to meet the unrestricted use category, it must meet the unrestricted (Category A) requirements for all trace elements and sharp foreign matter. If the compost fails one criterion of the guideline for unrestricted use but meets the criteria for restricted (Category B) use, then it is classified as a Category B product. Products that do not meet the criteria for either Category A or B must be used or disposed of appropriately.

Appendix III
Compost Agricultural Product Value
as is basis

Agricultural End-Use	Analysis Result	Unit	Quantity in lbs/T
Physical Parameters			
Dry Matter	60.31%	%	
pH	7.9		
Bulk Density	611	kg/m ³	
C:N Ratio	18:1		
Fertilizer Equivalent Minerals			
Nitrogen Total	1.47%	%	29.4
Ammonium Nitrogen	20.43	ppm	0.04
Total Phosphate (P as P205)	0.22%	%	4.4
Total Potash (K as K2O)	0.49%	%	9.8
Calcium	3.44%	%	68.8
Magnesium	0.74%	%	14.8
Sulfur	910.68	ppm	1.8

The Compost Quality Assurance program goes beyond the provincial requirements to establish full value and appropriate end-use. The Compost Report and Compost End-use table in Appendix II, has 10 different compost application uses from soil remediation, through to potting soil blends. Of note are available soluble salt limits and the percent available sodium for sensitive plants. Appendix III, lists the primary agricultural use parameters and quantitative nutrient content that reflects this compost samples agricultural end-use, and application value. This value includes macro and micro nutrients, soil building properties such as the addition of organic matter, increasing moisture holding capacity, and the soils slow release nutrients. These parameters improve beneficial soil health components soil structure and stability.

The results of our testing on this sample indicates that this product is a fine textured, mature compost (90%+ 1/4 in.), with rich mineral properties, which would meet criteria for agricultural soil amendment, blending and topdressing end-uses purposes. The C:N ratio 19:1 from Appendix II, on the soil suitability report indicates a low C:N ratio and indicating good nitrogen availability. The low C:N ratio in conjunction with the higher total nitrogen content listed in Appendix III indicates early high available nitrogen levels, and should be considered for crop planning.

The proportion of available sodium (% Na), which if used in too heavy a proportion could cause some problems with sensitive species. The sodium levels of this compost sample though high, is suitable for agricultural broadcast field applications and are made to improve the organic matter level and major nutrients phosphorus, potassium and magnesium levels. The compost is also rich in available calcium, sulfur, and zinc, which make it ideal for soil enriching, and amendment. We recommend blending this material at a minimum of 2-3 parts soil blended to each part of this compost to dilute the sodium concentration.

Major Nutrients - Compost is classified in Schedule II (CFIA Fertilizer Act & Regulations) as a supplement, and as such, nutrient guarantees are not mandatory. However, if any claims are made regarding nutritional value of the product, such as for composted manure, the product would then be classified as a supplement and a fertilizer, and label would have to include the guarantees for the major nutrients. The guarantees for the major nutrients include the minimum amounts of Total Nitrogen (N), Available Phosphoric Acid (P205) and Soluble Potash (K2O).
