

ADDENDUM #1

ESSEX-WINDSOR SOLID WASTE AUTHORITY REQUEST FOR TENDER FOR THE SUPPLY & SERVICE OF ONE (1) TRACK TYPE DOZER WITH A FIVE YEAR SERVICE CONTRACT (Minimum Operating Weight of 41, 500 kg)

Tender Issue Date: Friday, September 13, 2019

Addendum Issue Date: Tuesday, September 24, 2019

Tender Closing Date: Thursday, September 26, 2019
12:00 p.m. (Noon)

1. It is understood that “Fire Risk Assessments” have been completed and exist for certain makes and models of construction equipment that provide the required specifications for fire suppression.

If a “Fire Risk Assessment” is not available at the time of Tender Call, the Tenderer shall submit a Vehicle Bill of Materials (VBOM) with the tender package that outlines the equipment that is required and will be recommended at a minimum for complete fire suppression of the supplied Dozer.

The successful Tenderer shall be required to complete and provide a Fire Risk Assessment following the award of the Tender and prior to the installation of the suppression system for review by the EWSWA.

2. Under the Track Type Dozer Specifications, the Tenderer shall also include “Impact/Cage” type guarding on the front, side and rear windows of the Dozer. The doors shall also be covered with guarding that can be removed for service work. The intent of this guarding is to minimize damage to the cab and door glass from impacts during landfilling operations.
