CONSIDER THE HIGH COST OF FOOD WASTE

When you waste food, you also waste all the resources it took to get it to your kitchen - the water for crops and livestock, the packaging, and the fuel to power the tractors and trucks to get it to the store. Canadians waste \$1,300 of food per year. Wasting food is bad for the environment and your wallet!

COMPOSTING

Food is a resource and should never be wasted. Buy a **backyard composter** for your veggie scraps - it's easy to make your own compost!

Plan out your meals for the week, and go to the grocery store with a list! Planning will help you **reduce food waste** and **save you money!**

Winter Roads Maintenance

During the winter months, main roads are cleared and salted first, followed by residential and secondary roads. Be sure to maintain a safe distance from snowplows and avoid pushing driveway snow back onto the road.

During winter snowfall, property owners are encouraged to:

- Park vehicles in driveways, not on the road.
- Maintain clear catch basins for proper drainage.
- Keep fire hydrants visible and snow-free.
- Clear sidewalks adjoining your property.
- Place garbage and recycle bins in the driveway approach, not on snow banks or the road.

Residents should wait to clear their driveway approaches until the plows have cleared the curb lanes.
